There is a **Save** option at the top of the timesheet, so you may wish to input your time worked at the end of each day/week and then save before submitting at the end of the month.

To submit your time, you should select either **Not Entered / Not Submitted** and find the applicable timesheet.

Select the **Action** icon.

In the units worked column, you should enter the number **'1'** for each day or **'0.5'** for each half day you have worked within the billing period. If you did not work a day during the month, this can be left at **'0'**.

If you have worked additional days that do not appear on the timesheet, you should use **Add New Row** then add any additional time.

Once your timesheet is completed, check the total at the bottom adds up correctly, and then hit **Send For Approval**.

If the client has a query on your timesheet, they have 3 options;

- Reject the timesheet in full, at which point you should re-enter time.
- Raise query to you so you can edit and re-send for approval
- Edit the timesheet themselves before approval.

Once the Client has approved your timesheet, you will receive an email notification. If this is not received, you can login to your account and check the status of any timesheet within the **Timesheets** page.
